

Puppy Dog Tray Set

Cutting

Cut out the following pieces in the colors specified on the patterns. Feel free to change to other colors if you prefer.

Color Code

A	SPE 200SF	white opal
B	SPE 215.72SF	terra cotta
C	SPE 1009SF	black
D	SPE 100SF	clear

Full Fuse Firing

- Place white glass PAW BOTTOMS together with white glass BRIDGE holding them together. Place white glass PAW TOPS on top of the PAW BOTTOMS.
- To create toe separators, paint on lines, apply lines of liquid stringer, or place on small pieces of black stringer.
- Set 2 layers EAR FLAPS against 2 layers FACE.

- Fire *Paw Assembly* and FACE to full fuse.

Tack Fuse Firing (onto full fuse pieces)

- Place EARS over FACE.
- Place clear glass EYES on FACE. Place black PUPILS on clear glass EYES.
- Place MUZZLE on FACE. Place NOSE on MUZZLE.
- Create WHISKERS using either paint or small premade glass nuggets.
- Create a MOUTH with either paint, liquid stringer, or black stringer.
- Fire *Face Assembly* tray to tack fuse.

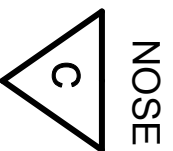

Drape/Slump Firing

- Drape the *Paw Assembly* over the steel mold and fire in kiln.
- Slump the *Face Assembly* into the steel mold and fire in kiln.

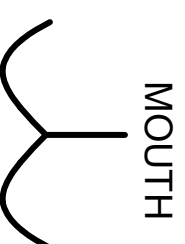

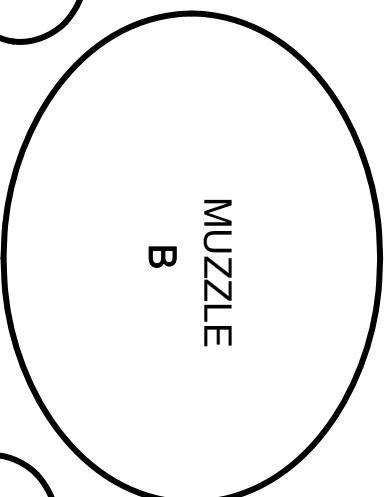

Final Assembly

Place the *Face Assembly* tray on the *Paw Assembly* base.. You can glue it on if you wish but I advise against it. Better to just set it on. Placing rubber bumpers on the *Paw Assembly* base will help prevent the *Face Assembly* tray from sliding of or out of place.
